WEDGE CLIPS

Introducing a faster, easier, BETTER way to fasten deck boards - the WedgeClip™. The patented WedgeClip™ design fits snugly in the grooves of deck boards for an easy one-pass, one-handed installation.

BLOCK

THE BETTER FLOATING FOUNDATION

Build a better freestanding deck from the ground up. If you're building a free standing deck 5½ in to 30 in tall, there's no better solution than CAMO BLOCK®

JOIST + LEDGER

DECK TAPE

Protect and extend the life of your deck with CAMO Joist + Ledger Deck Tape. This self-adhesive butyl tape creates a waterproof membrane to protect wood deck framing against moisture, which can lead to rot.

CAMO®

NEW FOR 2024

CAMO was born from innovation, and that spirit is still alive in all we do. We push ourselves to think outside the norm in continuing to invent better tools and fasteners to help the Everyday Doer - the pro deck builders, remodelers, and DIYers - build the best possible deck.

We never stop connecting, listening, and learning from Everyday Doers, and it's from those insights that help us launch new products like the WEDGE and WEDGEMETAL Clips, new in 2024. The clip's patented design fits snugly in the grooves of all deck boards for an easy one-pass, one-handed installation.

As a brand entirely focused on the better way to build a deck, expanding our product line offering to include Joist + Ledger Deck Tape and the CAMO BLOCK® just makes sense. These products are easy to use and install, transforming the way you work.

(p. 8-9)

UNIVERSAL DECK CLIPS

CAMO deck clips make installing grooved decking on wood or metal joists easy for everyone.

These hidden deck clips are designed and warranted for use with leading grooved deck boards and result in a beautiful fastener-free surface that you can install in half the time of other hidden fasteners. Fasten EDGE[®], WEDGE[™], and WEDGEMETAL[®] Clips by hand with the NEVER-MISS[®] Guide or standing up with ClipDRIVE[™] and DRIVE.

STARTER

- Secure the first and last board to achieve a completely fastener-free deck surface on wood joists
- Designed for use with leading grooved deck boards
- Screw tip bites into joist quickly
- Versatile clip can also be used as an L-bracket
- 304 stainless steel clip and 304 stainless steel screw

SKU#	DESCRIPTION	COVERAGE	QTY	DRIVER BIT	CT./MASTER

CAMO DRIVE®

- Attaches to your drill
- Use with CAMO Collated Edge Screws, Collated Face Screws, and CAMO Universal Deck Clips
- Fasten square* pressure treated, KDAT, cedar, redwood, composite, PVC, and grooved deck boards
- Easy to use, featuring a reversible handle and quick-change nose pieces
- Stand-up fastening allows for fast installations that are easy on the body

SKU#	DESCRIPTION	QTY	CT./MASTER
0345060	DRIVE	1	1

THREE WAYS TO FASTEN WITH DRIVE

Use the Edge nose piece with CAMO Collated Edge Screws (p. 12)

Use the Face nose piece with CAMO Collated Face Screws (p. 12)

Use the Clip nose piece with CAMO Universal Deck Clips (p. 8-9)

**For most square decking installs, we recommend using secondary spacers to allow for expansion, contraction, and drainage.*

COLLATED SCREWS

CAMO Collated screws are exclusively designed for use with the DRIVE tool.

Each fastener was intentionally created and collated for peak performance in its given application. Collated screws are available in 1000 ct. quantities, which cover 285 sq ft (26.48 m²) and come with their corresponding driver bits: T-15 for Edge Screws and T-20 for Face Screws.

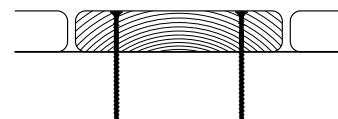

FOR EXCLUSIVE USE WITH DRIVE TOOL

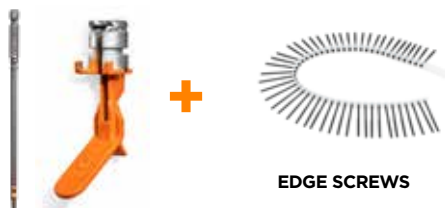

EDGE

FACE

EDGE SCREWS

The Best Deck Screws You'll Never See.

CAMO Edge Screws are an innovative, easy-to-install hidden fastener that delivers a high-end look at an affordable price. They are for exclusive use with MARKSMAN PRO[®] tools. Edge Screws feature a patented rake tip that augers material out as you drive to reduce board splitting and a trimhead to reduce visibility. They are available in CAMO's proprietary PROTECH coating and 316 Stainless Steel.

PROTECH[®] COATED

PROTECH is our coating that is suitable for use with pressure treated lumber, PVC, composite, and capped composite deck boards in inland environments that face regular exposure to the elements.

316 STAINLESS STEEL MARINE GRADE

316 Stainless Steel is the best fastener for any project and is required for installations in highly corrosive areas like structures that are near saltwater, or that will be exposed to harsh chemicals like chlorine, wood strippers, or ice melt.

DECK BOARD MATERIAL	RECOMMENDED CAMO EDGE SCREW
Pressure Treated Lumber	Stainless Steel or PROTECH Coated
Composite	Stainless Steel or PROTECH Coated
Capped Composite	Stainless Steel or PROTECH Coated (with pre-drilling)
PVC	Stainless Steel or PROTECH Coated
Cedar	Stainless Steel Required
Redwood	Stainless Steel Required
Hardwood or Imported Hardwood	Stainless Steel Required (with pre-drilling)

EDGE SCREWS

- For use with all square edge deck boards, including pressure treated, composite, PVC, capped composite, cedar, redwood, and hardwood
- Features a patented rake tip that augers material out as they're driven, reducing the potential for splitting and cracking*
- T-15 Star Drive offers best connection, reducing cam-outs and stripped screws
- Trimhead reduces visibility on the edge of the board
- Available in PROTECH coating and 316 Stainless Steel

*Pre-drilling is required for hardwoods and capped composites

CAMO BLOCK[®]

THE BETTER FLOATING FOUNDATION

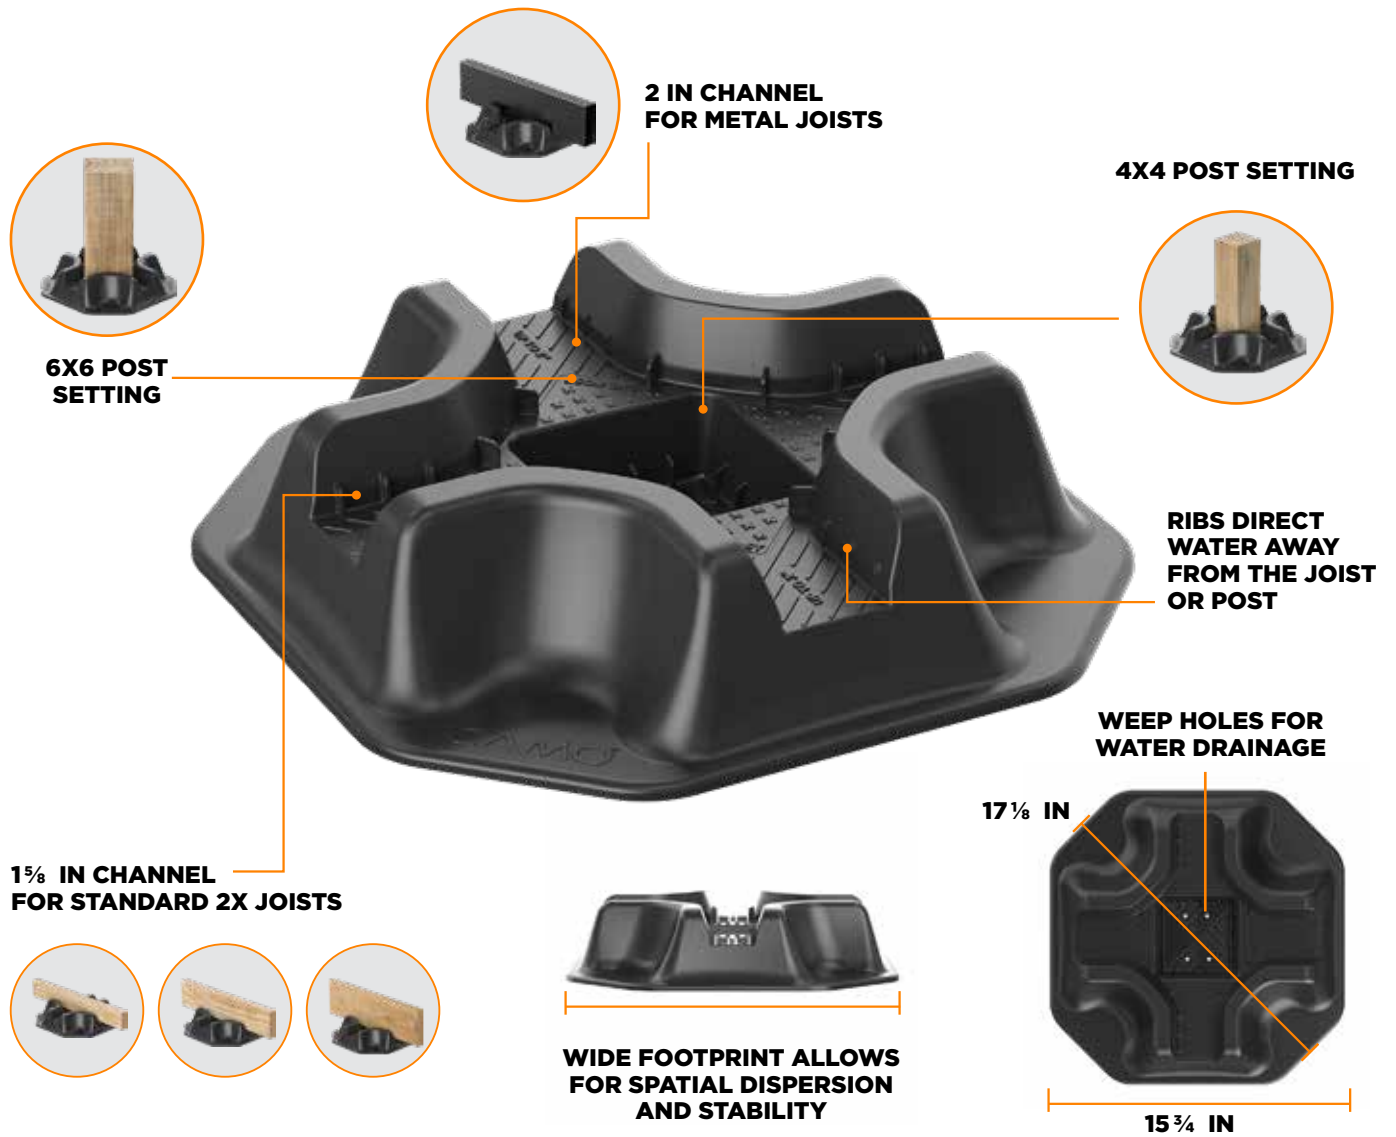

Build a better freestanding deck from the ground up. If you're building a freestanding deck 5½ in to 30 in tall, there's no better solution than CAMO BLOCK[®].

- Lightweight - 18x lighter than cement footings - each BLOCK only weighs 2.16lb.
- Load rated to support 1800 lb, making them stronger than cement footings
- Made from recycled material and can be recycled when it's at the end of its life
- Comes with a 30-year warranty, will not chip, crack, or corrode, and is vented to prevent water build-up, rot, and mold.
- Easy to install and transport

CAMO LEVER[®]

BOARD BENDING AND LOCKING TOOL

Build a better deck by yourself with LEVER, the one-turn tool that locks-in rows of boards and clips and straightens warped boards.

- Speeds up grooved deck installs—locks-in rows of boards and clips before fastening
- Strong enough to straighten any warped board
- Easily adjusts to wood and metal joists 1-½–3 in wide for jobsite versatility
- Multi-directional lever locks in one turn

SKU#	DESCRIPTION	QTY	CT./MASTER
0345070	LEVER	1	4

LOCKS BOARDS & CLIPS

Use 2-4 LEVER tools across the length of the deck for the best clip installation experience with consistent spacing.

BENDS WARPED BOARDS

One LEVER is strong enough to straighten out warped pressure treated and hardwood boards in one turn.

ANY JOIST MATERIAL

Works on wood and metal joists

ANY JOIST WIDTH

Adjusts to joists 1-½ to 3 in wide

ANY BOARD TYPE

Straightens and locks any board at any angle

ONE TOOL FOR EVERY JOB

EXTERIOR FASTENERS

CAMO offers a high-quality line of exterior fasteners that deliver on reliability no matter the project.

CAMO fasteners start fast, hold strong, and create long-lasting connections. Our fasteners are coated with high-performance exterior-grade coatings, and can be used on interior projects as well. Our comprehensive line includes Deck, Composite, Trim, and code-compliant Structural screws along with a line of marine-grade Stainless Steel fasteners. Make CAMO your one-stop shop for all your performance screw needs.

RECOMMENDED APPLICATIONS FOR EACH SCREW TYPE

<ul style="list-style-type: none"> • Wood decking projects • Fences • Any exterior wood-to-wood connection 	<ul style="list-style-type: none"> • Composite decking projects • PVC decking projects 	<ul style="list-style-type: none"> • Wood and PVC Decking • Exterior trim • Deck rails • Balusters • Fences 	<ul style="list-style-type: none"> • Wood patios • Wood decks • Other exterior wood to wood connections in corrosive environments 	 <ul style="list-style-type: none"> • Truss • Multi-Ply • Multi-Ply + Ledger • Framing • Multi-Purpose
(p. 29-30)	(p. 31-33)	(p. 34-37)	(p. 59-60)	(p. 38-45)

CAMO Exterior Fasteners also for Interior use

STAINLESS STEEL

CAMO offers a comprehensive line of Stainless Steel screws and nails to help you build a better deck in corrosive environments.

305 STAINLESS STEEL

Great corrosion resistance for most inland exterior projects.

316SS MARINE GRADE

Best corrosion resistance for projects in highly corrosive environments.

DECK SCREWS

- For any wood-to-wood connection
- Type 17 slash point starts fast and reduces splitting
- Buglehead and 2/3 thread design draw the board tight
- Star Drive provides more points of contact, reducing cam-outs
- Available in green and tan PROTECH coating to blend into wood surfaces, and 305 Stainless Steel and 316 Stainless Steel for maximum corrosion resistance

COMPOSITE SCREWS

- Color-matched screws for composite and PVC decking projects
- Type 99 double slash point augers board material out for fast driving
- Trilobular shank reduces torque and prevents mushrooming
- Reverse thread at top increases pull-down power while cutting lead edge creates a flush finish
- T-20 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- Available in PROTECH coating and 316 Stainless Steel for maximum corrosion resistance

COLOR MATCHER

Our Composite screws are available in painted finishes to match popular deck boards. Use the color matcher on camofasteners.com to find the right color for your board.

TRIM SCREWS

- For exterior deck, trim, and finish applications with wood and PVC
- Type 17 slash point starts fast with no pre-drilling
- Trimhead screw reduces visibility in finish projects
- T-15 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- Available in green PROTECH coating to blend into wood surfaces, bright 305 and 316 Stainless Steel, and painted 316 Stainless Steel

STRUCTURAL SCREWS

CAMO offers a full line of high-performing, code-compliant structural screws for all your deck and framing needs. They are engineered to start fast, drive smooth, and hold strong. No pre-drilling required. Features our industry-leading propriety coating for superior corrosion resistance.

See pg. 62 for more information

CODE COMPLIANT

Our structural screws have been third-party tested, audited, and certified as IBC and IRC code-compliant by Dr J Engineering

- Our line covers all popular interior and exterior structural applications
- Engineered to start fast, drive smooth, and hold strong - no pre-drilling required
- Rigorously tested and approved for use with pressure-treated lumber
- IRC and IBC code compliant, State of Florida FL 41741
- Available in corrosion-resistant Hot Dip Galvanized and PROTECH® Ultra 4 Coating

TRUSS SCREWS (GUIDE INCLUDED)

- Code listed per DrJ TER No. 2102-01 and 2102-03 and State of Florida FL 41741
- For truss and rafter to top plate, stud to top plate, and deck joist to beam connections
- Replaces hurricane ties
- Fully threaded for maximum holding power
- Cylinder head easily countersinks for flush studs
- Sharp point starts fast with no pre-drilling, reducing drive time
- Slashes for reduced splitting
- T-30 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- Includes easy-to-use truss screw guide
- CAMO® PROTECH® ULTRA 4 coating
- For interior and exterior use

FRAMING SCREWS

- Code listed per DrJ TER No. 2102-01 and State of Florida FL 41741
- For wood-to-wood framing connections, deck blocking, interior and exterior projects
- Replaces 8d, 10d, and 16d nails in interior and exterior framing applications
- Straight knurl reduces driving torque
- 6 nibs underhead help countersink screw
- Sharp point starts fast with no pre-drilling, reducing drive time
- Slashes for reduced splitting
- T-25 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- CAMO® PROTECH® ULTRA 4 coating

5/16 in Flat Head Screws available in 8" and 10" lengths for Multi-Purpose applications - see p. 43

MULTI-PURPOSE FLAT HEAD SCREWS

- Code listed per DrJ TER No. 2102-01 and State of Florida FL 41741
- For deck posts, beams, and general construction projects
- Replaces traditional lag screws and through-bolts
- Straight knurl reduces driving torque
- Nibs underhead help countersink screw
- Sharp point starts fast with no pre-drilling, reducing drive time
- Slashes for reduced splitting
- Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- CAMO® PROTECH® 4 coating
- For interior and exterior use

STAINLESS STEEL FASTENERS

CAMO® offers a comprehensive line of Stainless Steel screws and nails to help you build a better deck in corrosive environments. Our 305 Stainless Steel screws deliver an aesthetic finish and hold up in your connections, while 316 Marine Grade Stainless Steel fasteners offer ultimate protection against corrosion in coastal and agricultural environments.

CORROSION RESISTANCE METER

While our PROTECH coating offers good resistance against mild corrosion, 305 and 316 Stainless Steel are the best alloys to build with in corrosive areas.

See p. 62 for more information

305 STAINLESS STEEL

- Exterior structures outside of 3,000 ft. from a saltwater shoreline
- Installations of pressure treated, PVC, composite, and capped composite boards
- Any outdoor project that you want to protect against potential corrosion

316 STAINLESS STEEL

- Coastal, marine, or waterway areas within 3,000 ft of saltwater
- Structures exposed to chlorine, wood strippers, or ice-melting chemicals
- Agricultural environments that deal with chemicals, pesticides, and treatments
- Installations of cedar, redwood, or hardwood decking where tannin release caused by carbon fasteners may cause staining

RECOMMENDED APPLICATIONS FOR EACH FASTENER:

DECK

- Wood decking projects
- Fences
- Any exterior wood-to-wood connection

COMPOSITE

- Composite decking projects
- PVC decking projects

EDGE

- Fasten any square edge deck board through the edge of the board using the MARKSMAN PRO® tools

TRIM

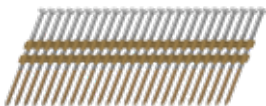

- Decking
- Exterior trim
- Deck rails
- Balusters
- Fences

HAND DRIVE NAILS

- Decking
- Wood-to-wood connections
- Joist hangers

COLLATED NAILS

- Framing
- General construction
- Decks and fences
- Metal joist hangers

316SS WEDGE™ CLIP

- Any deck pattern on wood joists

UNIVERSAL DECK CLIPS

NEW

WEDGE™

- Any deck pattern on wood joists
 - One-pass fasteners—clip sits in the groove of the board until you're ready to fasten
 - Use with grooved composite, PVC and hardwood boards
 - Clip body creates 3/16 in (4.7mm) spacing
- Gusset holds boards down
 - 316 stainless gusset, 316 stainless screw, nylon plastic spacer body
 - Fasten with included• NEVER-MISS® Guide or while standing up with the CAMO ClipDRIVE™ or DRIVE.

SKU#	DESCRIPTION	QTY	COVERAGE	DRIVER BIT	CT./MASTER
0344654S	WEDGE Clip - Any Deck Pattern on Wood Joists	90	50 sq ft (4.64m²)	1 - T-15	8

0344656S		900	500 sq ft (46.45m²)	2 - T-15	1

DECK SCREWS

- For fastening wood decking and other wood-to-wood connections in corrosive environments
- Type 17 slash point starts fast with no pre-drilling, reducing drive time
- Buglehead draws board tight, increasing pull-down strength
- 2/3 thread design offers premium holding power
- T-25 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear
- Available in 305 Stainless Steel and 316 Stainless Steel

COMPOSITE SCREWS

- Color-matched screws for securing composite and PVC decking in highly corrosive environments
- Type 99 double slash point augers board material out for fast driving
- Trilobular shank reduces torque and prevents mushrooming
- Reverse thread at top increases pull-down power
- Cutting lead edge creates a flush finish
- T-20 Star Drive provides more points of contact, reducing cam-outs and limiting bit wear

COLOR MATCHER

Our Composite screws are available in painted finishes to match popular deck boards. Use the color matcher on camofasteners.com to find the right color for your board.

305 STAINLESS STEEL

Bright Collated Face Screws for Composite

- For exclusive use with the CAMO® **DRIVE** Tool

SKU#	SIZE	QTY	DRIVER BIT	CT./MASTER
0395080	2-½ in (63.5mm) x #10	1000	2 - T-20	1

EDGE SCREWS

- Fastens all square edge deck boards: pressure treated, composite, PVC, capped composite, cedar, redwood, and hardwood
- Patented rake tip augers material out as they're driven, reducing the potential for splitting and cracking*

**Pre-drilling is required for hardwoods and capped composites*

- Trimhead reduces visibility on the edge of the board
- T-15 Star Drive offers best connection, reducing cam-outs and stripped screws

316 STAINLESS STEEL MARINE GRADE Edge Screws

- For exclusive use with CAMO® **MARKSMAN PRO** Tools

POWER BITS

- Power bits come in each pail of exterior screws for convenience on the jobsite.
- 2 in (50.8mm) long
- Premium Star Drive power bit allows for better connections

SKU#	DESCRIPTION	QTY	CT./MASTER
0333900	T-15 Star Drive Power Bit	3	10
0333910	T-20 Star Drive Power Bit	3	10
0333920	T-25 Star Drive Power Bit	3	10

HAND DRIVE NAILS

316 STAINLESS STEEL MARINE GRADE

Ring Shank Deck Nails

- For fastening wood patios and decks and other exterior wood-to-wood connections in corrosive environments
- Diamond point starts easily
- Ring shank offers superior holding power and withdrawal force
- Checkered flat head provides a large striking surface, reducing hammer slippage for easy drive connection

SKU#	SIZE	QTY	SHANK	CT./MASTER
5246158S*	2-½ in (63.5mm) x #8	1 lb	Ring	4
5246155S*		5 lb	Ring	12
5246178S*	3 in (76.2mm) x #10	1 lb	Ring	12

5246179S*		25 lb	Ring	4
5246188S*	3-¼ in (82.5mm) x #12	1 lb	Ring	12
5246185S*		5 lb	Ring	4
5246195S*	3-½ in (88.9mm) x #16	5 lb	Ring	12
5246199S*		25 lb	Ring	4

316 STAINLESS STEEL MARINE GRADE

Joist Hanger Nails

- For installing joist hangers to wood framing in corrosive environments
- Diamond point starts easily
- Smooth shank is fast and easy to drive
- Short, heavy gauge provides superior holding power
- Flat head provides a large striking surface for easy drive connection

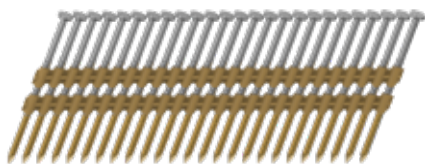

SKU#	SIZE	QTY	SHANK	CT./MASTER
5096095S*	1-½ in (38.1mm) x #9	5 lb	Smooth	4

COLLATED NAILS

316 STAINLESS STEEL MARINE GRADE

Collated Ring Shank Framing Nails
(21° Plastic Strip)

- For general construction, framing, deck, and fence building in corrosive environments
- Ring shank offers superior holding power and withdrawal force
- Round head provides greater resistance to pull out
- 21° plastic strip fits most 20°–22° framing nailers

SKU#	SIZE	QTY	SHANK
5710258S*	2- $\frac{3}{8}$ in (60.3mm) x .113	1000	Ring
5710176S*	3 in (76.2mm) x .120	1000	Ring
5710286S*	3- $\frac{1}{4}$ in (82.5mm) x .120	1000	Ring

316 STAINLESS STEEL MARINE GRADE

Collated Metal Hanger
Nails (31° Paper Strip)

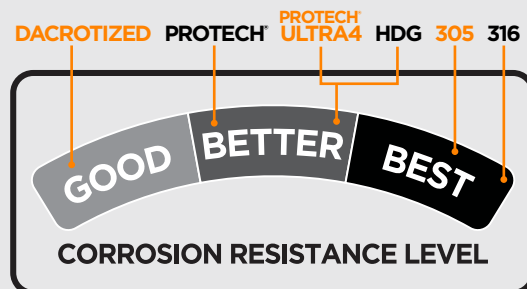

- For metal connectors, joist hangers, joist ties, and hurricane straps in corrosive environments
- Smooth shank provides good holding power
- Round head provides greater resistance to pull out
- Metal hanger nail strip fits most 31° metal connector nailers

SKU#	SIZE	QTY	SHANK
5606090S*	1- $\frac{1}{2}$ in (38.1mm) x .148	1000	Smooth

WHAT CAMO FASTENERS ARE MADE OF

Building a deck, framing a house, or tackling any exterior project with CAMO fasteners means **building better**. CAMO fasteners start **fast**, create **strong connections**, and **hold up to the elements** over time, thanks to their coating and alloys.

Learn more about each option below so **you can be confident** you've got the right fastener for your project and gain **peace of mind** knowing that they are all **backed by a CAMO Warranty**.

PROTECH[®]

PROTECH is our proprietary coating for our steel screws. It is suitable for use with pressure treated lumber, PVC, composite, and capped composite deck boards in inland environments that face regular exposure to the elements. Our PROTECH-coated fasteners are guaranteed against rust and corrosion for the life of your project so long as they are installed following CAMO recommendations.

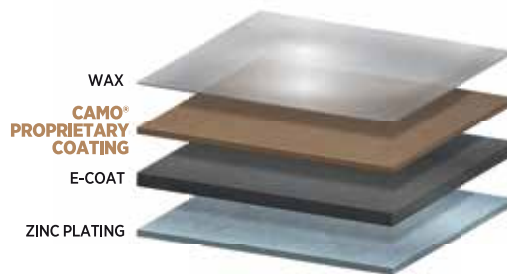

PROTECH-COATED FASTENERS ARE SUITABLE IN MANY APPLICATIONS:

- Decks, patios, and structures in inland areas away from water
- Installations of pressure treated, PVC, composite, and capped composite boards
- Exterior projects in temperate climates that face typical weather events

PROTECH[®] ULTRA 4

Our proprietary PROTECH Ultra 4 four-layer coating system provides optimum corrosion resistance, UV and environmental protection, and torque reduction for a high-performing, long-lasting screw. Tested in accordance with ASTM G198, the coating meets or exceeds the protection of code-approved hot-dip galvanized (ASTM A153, Class D) in ground contact general use pressure treated lumber (AWPA UC1-UC4A). We test our coating 2X longer than industry standard requires, so you can be confident your connections will stand the test of time.

PROTECH ULTRA 4-COATED FASTENERS ARE SUITABLE IN MANY APPLICATIONS:

- For interior and exterior projects where corrosion resistance is key
- Structural projects that utilize a larger screw with a greater surface area, coming in contact with more wood
- Installations with ground contact general use pressure-treated lumber

HOT-DIP GALVANIZED

A small step under Stainless Steel in terms of corrosion protection, hot-dip galvanized coating is a viable and reliable option for various fasteners. The code-approved coating is tested to meet ASTM A153, Class D, and is approved for use in MCA ground contact pressure treated lumber.

The hot-dip galvanization process results in a thick coating that will wear over time but still offer excellent protection against corrosion for the lifetime of the exterior application. Additionally, the coating is applied uniformly, so your connections are completely protected.

HOT-DIP GALVANIZED COATING IS COMMONLY USED IN THE FOLLOWING APPLICATIONS:

- Exterior projects in temperate climates that you want to protect against the elements
- Structural projects that utilize larger screws with a greater surface area, coming in contact with more wood
- Coastal applications

305 STAINLESS STEEL

If your project is outside of 3,000 feet from a saltwater shoreline, Stainless Steel fasteners are recommended, and CAMO 305 Stainless Steel fits the bill. 305 Stainless Steel offers better resistance against corrosion than a carbon coating and will keep your project safe and long-lasting while offering excellent aesthetics. Widely available across the country, 305 Stainless Steel is a great alloy option for installing pressure treated lumber, PVC, composite, and capped composite deck boards no matter where you are located.

305 STAINLESS STEEL IS GREAT FOR A VARIETY OF APPLICATIONS:

- Exterior structures 3000 feet to 10 miles from a saltwater shoreline
- Installations of pressure treated, PVC, composite, and capped composite boards
- Any outdoor project that you want to protect against potential corrosion

316 STAINLESS STEEL

316 Stainless Steel is the best fastener for any project and is required for installations in highly corrosive areas, so your build remains structurally sound and aesthetically pleasing.

Saltwater environments present an opportunity for severe rust and corrosion, so 316 Stainless Steel is required in any coastal, marine, or waterway area within 3,000 feet of saltwater. We also recommend using 316 Stainless Steel in structures within a 10-mile reach of saltwater, which are susceptible to increased corrosion rates as saltwater is aerosolized.

316 STAINLESS STEEL IS RECOMMENDED IN A VARIETY OF APPLICATIONS BEYOND SALTWATER EXPOSURE:

- Structures near swimming pools where the surface will be exposed to chlorine
- Agricultural environments that deal with chemicals, pesticides, and treatments
- Decks, patios, and structures that will face wood strippers or ice-melting chemicals
- Installations of cedar, redwood, or hardwood decking where tannin release caused by carbon fasteners may cause staining and streaking
